## UNIQUE TECHNOLOGY

## HIGH POWER TECHNOLOGY THAT LEAD THE INDUSTRY

### SMART TEMPERATURE CONTROL TECHNOLOGY

Each product built with temperature controller, it will adjust the internal temperature of the lamp automatically according to the ambient temperature changes and to ensure the product reliability and lifespan.

### DOB SWITCH TECHNOLOGY

Driver from the high temperature sealed heat chamber by moving to lower blister, drops the ambient temperature by more than 30 degree C, which greatly improve the life of the component. Effective in avoiding rapid light decay.

### DPT COATING TECHNOLOGY

We use the DPT high radiation coating for our products, and the heat radiation increased from 0.3 rad to 0.9 rad, which can greatly improved the high power products heat dissipation ability.

### SHORT RUNWAY THERMAL MANAGEMENT TECHNOLOGY

With the "short runway" heat dissipation design, it makes the high power products lighter, more environmental friendly and more comfortable to use.

## 230° BEAM ANGLE

Designed with precision to aim wider beam angle coverage than the old and conventional lamp bulb.

MODEL	RATED POWER	COLOR TEMPERATURE	LIFETIME	EFFICIENCY	WORKING VOLTAGE	PF	CRI	SIZE

3-LEAF

Foldable  
LED Lighting

## FEATURES

FOLDABLE LAMP

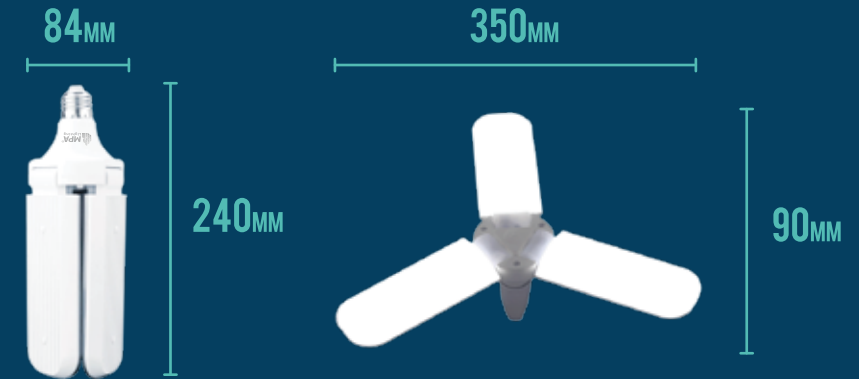

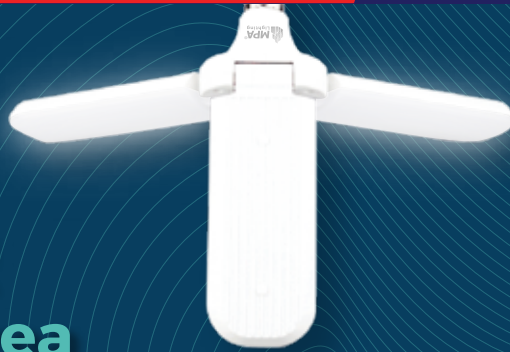

BIGGER LIGHTING AREA

Suitable for shops along the street,  
and can completely replace UFO lamps and CFL.

## BIGGER Lighting Area

- The lighting area is expandable and the illuminating diameter is increased from 84mm to 350mm.
- The light has a bigger lighting area and a better brightness.

**3-LEAF**

## FOLDABLE Lamp

**The three-leaf allows the lamp body to be folded.**

- Compared with the traditional 35W UFO lamp, it saves packaging space, and a 40' High Cube Container can hold **52%** more.

LONGER LIFETIME

## TECHNICAL DATA

## SLOPE ANTI-DUST DESIGN

### Let Dust slip off!

Compare to the last generation, aluminium sheet cooling material groove with slope anti dust design. Effectively avoid the dust accumulated, increasing the heat dissipation and make sure the heat dissipation channel unhindered.

30%

Area increasing

T- plus 2016s 40W  
Cooling surface area:  
74 x 10000mm

T- plus 2016s 40W  
Cooling surface area:  
57 x 10000mm

74,000mm<sup>2</sup>

### Enlarge Cooling Surface Area

The cooling surface area of the first generation T-PLUS is 57,000mm<sup>2</sup>. The new generation shop bulbs with aluminium die casting-sheet design make sure the heat dissipation area increasing 30% and welding temperature is reduced 10degree.

## INTERNAL STC SYSTEM

### A Smart Lamp!

When the internal temperature is too high, the STC will automatically adjust the temperature by controlling the current.
