IF316

IF316 hand shower is designed for children and combines 3 spray modes in its showerhead. Its sphere features 3 coloured areas with different nozzles. A slight twist of the shower-head is sufficient to make the sphere rotate and, through this, to set the desired spray function – standard, massage or waterfall. This quick change between colours and function brings fun to the daily shower routine. The handle is shortened and rounded, which makes it easier to hold and handle for children.
