FRAP PROFILE

FRAP is a well-known international brand with long history. As an expert in the sanitary ware category, FRAP will offer our clients with the best advice and services to satisfy you with the best product.

Ever since FRAP was established in 2002, we have been providing vast majority of highly innovated sanitary ware products, such as basin faucets, kitchen faucet, bathtub faucet, shower heads, hand shower, shower sets, bathroom accessories, pipe fittings and valves, hose, shower curtains, and many more.

FRAP has the capability to oversee all the production process until it was safely arrived at your destination. The process will meet our international standard quality, starting from finding the material, production process, assembly units and packing details. Our strength involves our ability for strong production capacity, perfect R&D performance, automatic digital manufacturing, large scale warehouse, intelligent logistics system, and well-trained staffs to maintain this progress.

Your satisfaction will be our guarantee.

www.frapsan.id

SHOWER HEADS

The shower head has a water-saving and energy-saving system, regardless of the amount of hydraulic pressure, the flow can always be monitored at 9.5 l / min

SHOWER HOSE

Shower hose 1,5m
Internal hose - EPDM
Braid - Chromed brass
Double braid strengthen
Brass fittings and nuts
Silicone gaskets - 2pcs
Rotation function of the shower head without hose twisting

CARTRIDGE FOR SINGLE HANDLE FAUCET

Frap faucets use ceramics cartridge from Sedal: in the faucets with single handle there're cartridges 25.35 and 40mm ceramic cartridge
The cartridges comes up to the European standard EN817 <Sanitary tapware ,. Mechanical mixers. General technical specifications>. Standardize the technical conditions for the operation of sanitary faucets
The standard service time of each cartridge exceeds 150 thousand cycles

CARTRIDGE FOR DOUBLE HANDLES

In the double handles of Frap faucets install cartridge with ceramic gaskets.
Frap faucet is opened when the handle turn to the spout, and it will be closed when turn away from a spout.
The angle of rotation is 180°, which adjust the water temperature.

PLATING

The plating of the product comes up to the European Standard. The products do not fade for years. The application of electroplating is fully automated. In the process of using cleaning (removal of wax, oil) is carried out. Electroplating on the surface of the product is smooth, clean and fine, which is different from the application of plating by hand.

FLEXIBLE HOSES

The hoses include: zinc-plated steel wires and "AISI 304" stainless steel braid, fittings (nuts, threaded connections) made of sanitary brass, internal hoses made of non-toxic rubber "EPDM". The materials fully meet international standards, which is confirmed by explosion testing of the hoses under the pressure of 2.5MPa and the torque test of the fixing nut with a force of 60

AERATOR

Frap faucets use NEOPERL products as water flow regulators. Most Frap faucets use NEOPERL aerators. It can improve the quality of the water flow without splashing and doesn't produce soft water.

BRASS

Luxury series of Frap faucets are made of excellent copper raw material. Copper content is more than 60%

NEOPERL®

Aerators saturate the flow of water with air, providing an unrivaled level of comfort and softness, as well as reducing splashing when water hits a washbasin or other surface.

QUORE

The rate of uninterrupted operation of each cartridge exceeds 150 thousand cycles.

MUTE TECHNOLOGY

The precise internal structure of the Frap faucet, the correct hydrodynamic design and the quality elements of the adjoining ensure that each mixer operates without noise and delay during use.

ECO-GREEN TECHNOLOGY

Energy-saving technology and new materials used in the production of Frap sanitary ware contribute to environmental protection.

THERMOSTAT

A special technical solution allows you to precisely adjust the temperature of hot and cold water. And protects hands against scalding when changing from hot to cold water. It can monitor the temperature change in one second and has a special protection function in case of water supply interruptions so that avoid burns.

CRYSTAL PLATING

The fifth layer creates a deep and uniform electroplating treatment. Coating of copper, nickel, chrome, etc. on the mixer provides reliable protection of the surface and guarantees its perfect mirror shining, keeps the product from contamination, from scratches, with ultra strong adsorption force that it never falls off.

CONTINUOUS EFFLUENT TECHNOLOGY

The "NEOPERL" aerator is a constant water outlet. The greater the water pressure is, the greater the traditional water flows. This is their disadvantage, but in NEOPERL aerators at a pressure of more than 0.14 MPa, a constant flow takes place, and saves water by more than 30%.

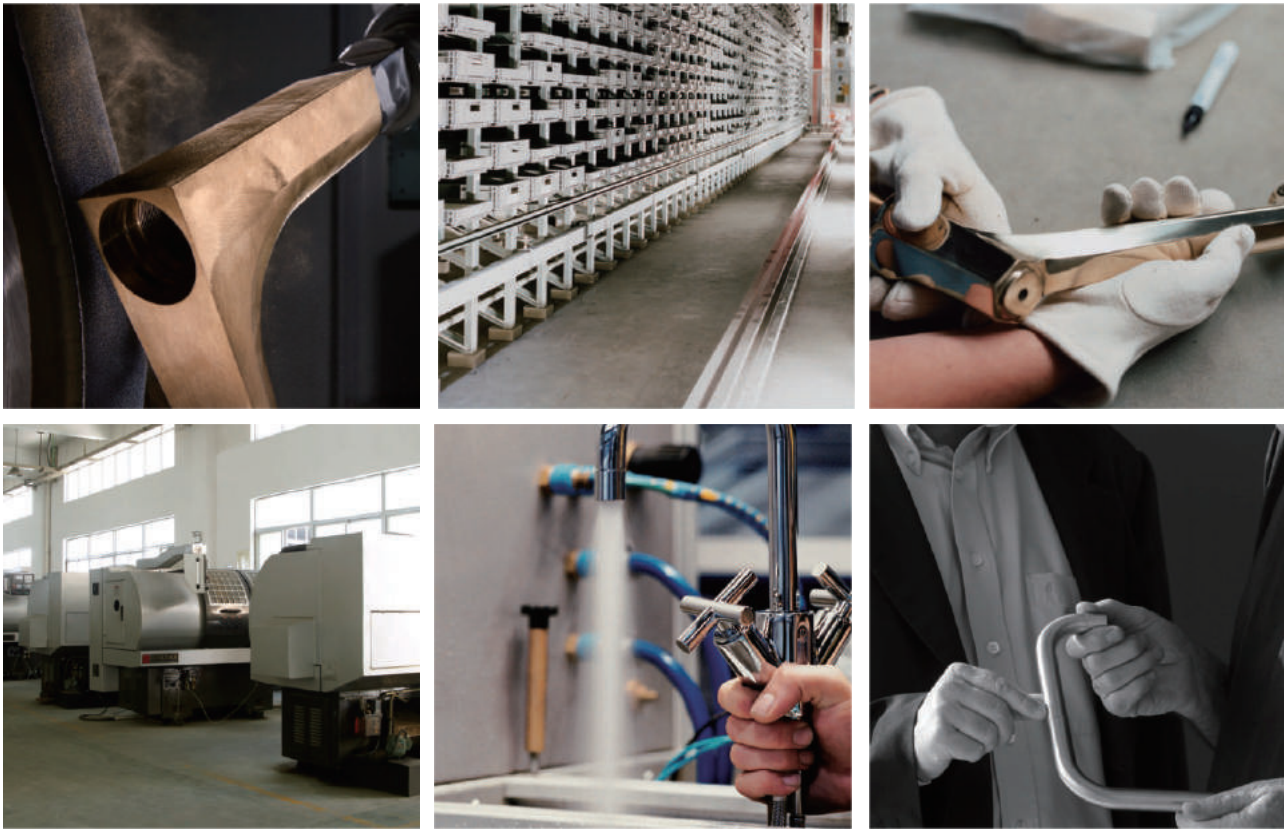

SMOOTH OPERATION TECHNOLOGY

Unique cartridge is made of modern ceramic alloy and special lubricating film. Special design of the reservoir ensures long service life of the product, leaving the cartridge smooth as new.

Modern Store Display

Basin mixers Wings

The Wings basin mixer combines traditional casting technology with a minimalist, modern design. Its appearance clearly sets it apart from the design of conventional basin mixers. The body and spout are strikingly flat, while the lever consistently complements its almost two-dimensional look. Water temperature and water flow are regulated by slightly rotating the lever, which – depending on the position of the handle – also adds visual accents.

ROUNDER PLASTIC
IFT.406.1432
Qty Ctn = 200 pcs

BLADE ROUNDER
IFT.407.1625
Qty Ctn = 200 pcs

PIPE CUTTER :
IFt.411.32
Used to cut: aluminum-plastic composite pipe, PP-R pipe,PE-RT pipe,REX pipe,PE pipe
Cutting diameter: no more than Ø32
Blade: high quality tool steel, sharper and wear resistance

Qty Ctn = 100 pcs

PIPE CUTTER :
IFt.412.42
Used to cut: aluminum-plastic composite pipe, PP-R pipe,PE-RT pipe,REX pipe,PE pipe
Cutting diameter: no more than Ø42
Blade: high quality tool steel, sharper and wear resistance

Qty Ctn = 50 pcs

PIPE CUTTER :
IFt.413.42
Used to cut: aluminum-plastic composite pipe, PP-R pipe,PE-RT pipe,REX pipe,PE pipe
Cutting diameter: no more than Ø42
Blade: high quality tool steel, sharper and wear resistance

Qty Ctn = 50 pcs

TAPE :
IF.PTFE.1210
Qty Ctn = 528 PAC
