NO SLIP SERIES

NEW INNOVATION – NO SLIP SERIES

Infiniti Granite Tile always innovates to improve higher quality products. Currently, Infiniti is making the latest innovations with No Slip Innovation feature.

No Slip Innovation feature is a revolutionary innovation with a special material that creates friction on the surface of the tiles when in contact with water. This will reduce the risk of slips and injuries in residential and commercial place.

Combining performance, aesthetics and adaptability. One texture, smoother and easy to clean, but with No Slip properties, it makes you and your family feel more secure (worry-free). This new technology has increased the tile's versatility where it can be used both indoors and outdoors especially for areas where there is a lot of contact with water and it is also easy to maintain.
