AROUND THE WORLD

CANADA, SINGAPORE, CHINA, EUROPE
INDONESIA
HONGKONG, USA, JAPAN & AUSTRALIA

Airland is one of Indonesia's best-known names in spring beds and other top-quality bedding products. In fact, our company, PT. Dinamika Indonusa Prima, was Indonesia's first producer of innerspring mattresses. Now, over a quarter of a century after its founding, Airland has grown to become Indonesia's premier manufacturer of high-quality bedding products.

The Airland brandname enjoys an outstanding international reputation. Our mattresses are the first choice for quality-conscious consumers throughout East Asia and well beyond, with an especially strong presence in Hong Kong, China, Japan, Singapore, Europe, United States and Australia.

Today, a team of energetic and committed young professionals guides the fortunes of our company. Yet we are not content to rest on past successes. We are working hard to strengthen Airland's already outstanding reputation for quality and dependability.

As our company continues in its second-quarter century, we are broadening the range of bedding products available, under the Airland brandname. We are also determined to win even greater customer loyalty through innovative designs, unmatched product quality and after-sales service our customers can really count on.

Nature: The Essence of Life

Natural elements have been used to improve our health and well being for many centuries. Airland's team of Sleep Experts have created and carefully handcrafted a range of products that utilises natural materials; each material chosen to provide additional health benefits, including: Effective reduction of allergies and sensitivity, Improved circulation throughout the body, Better comfort through the relief of pressure points, High moisture absorption qualities, Natural antibacterial and antifungal properties. Airland's Natural range of mattresses is highly recommended for better health and better sleep, suitable for the whole family - babies, young children and adults.

Good Health

To have good health means that you have to care for your physical, emotional, intellectual, and spiritual well being. If any of these four elements are dysfunctional, unfit or imbalanced, you may fall ill. Falling ill may possibly lead to restless sleep. Airland is working with groups of doctors, physiotherapists, nutritionists and other health experts to help address some of these issues through medical information, consultation and referrals.

Good Mattress

Once you have good health, you need a good mattress to sleep on. A good mattress must have the following components: state-of-the-art back support technology such as Chiropedic System, body-hugging contour fit system, and good quality padding.

Good Environment

While good health and good mattress are prerequisites for a good healthy sleep, your sleep may not be totally restful without a conducive sleep environment. You should have: an uncluttered bedroom with good ventilation, a temperature controlled bedroom that is not too hot and not too cold, low noise environment, warm, indirect light in the evening, and total or near total blackout in the morning.

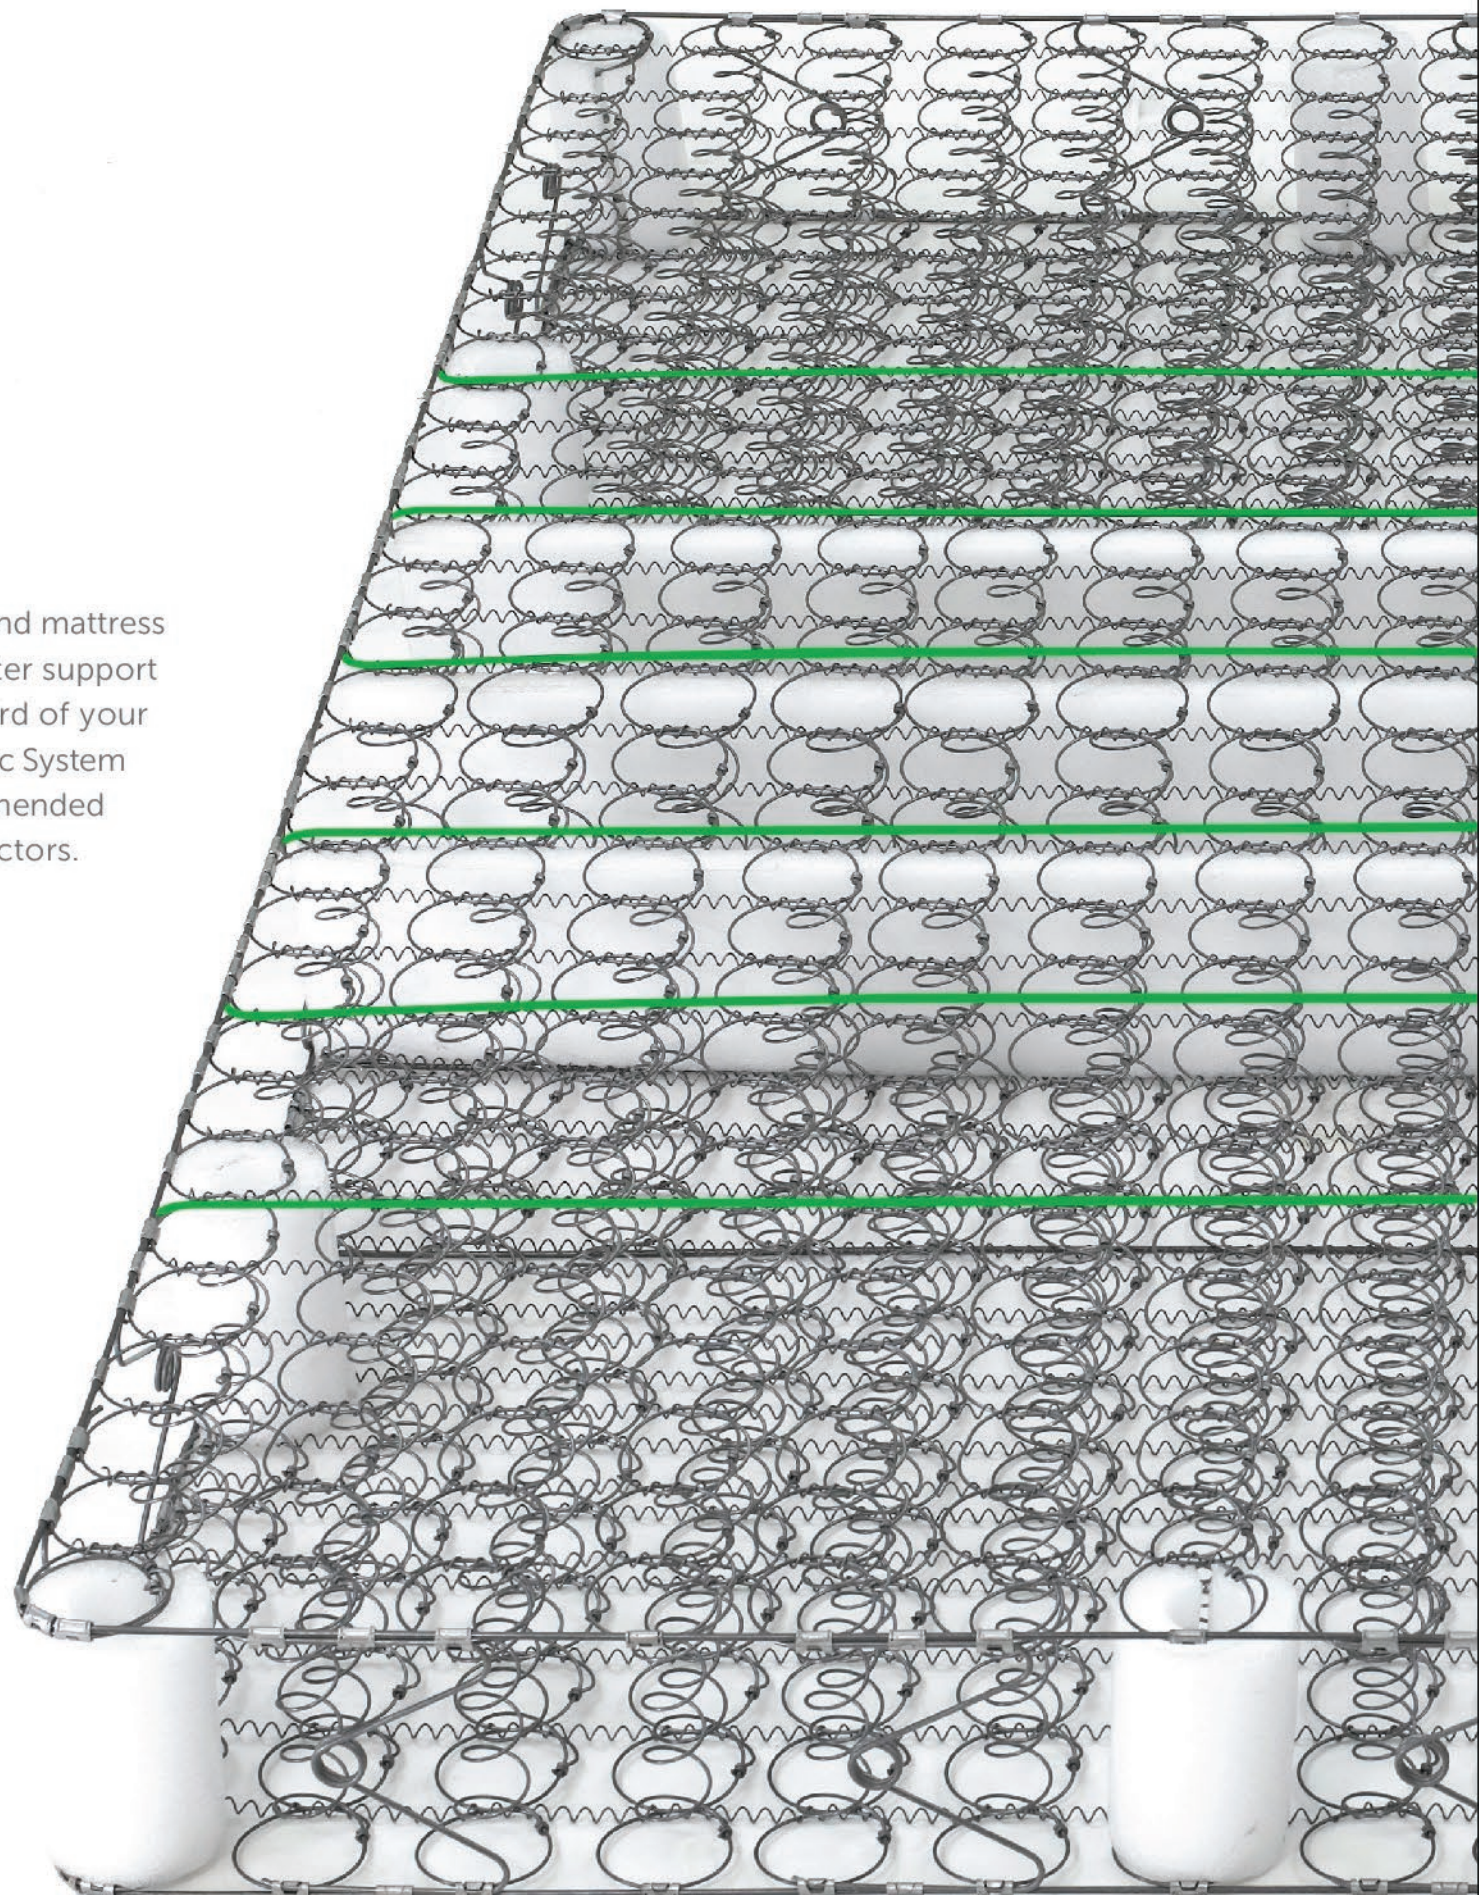

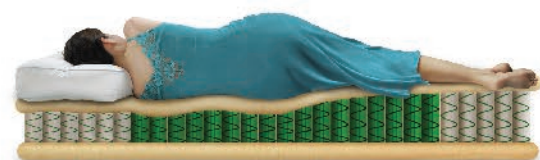

CHIROPEDIC SYSTEM

Chiropedic System allows you to sleep on an Airland mattress perfectly. The Chiropedic System lends you greater support and firmness where it is needed at the middle third of your body, from shoulder to thigh. The Airland Chiropedic System is well-known in the health industry and is recommended by most Physiotherapists, Doctors, and Chiropractors.

CHIROPEDIC SYSTEM Benefits include:

1. Prevention of backpain
2. Maintaining healthy and straight backbones while sleeping
3. Provides the greatest stability within the mattress when you sleep on it
