Kunci Fingerprint DUMONT telah menggunakan teknologi patent fingerprint terkini dengan fokus otomatis (AUTO FOCUS), mirip camera SLR yang dapat membuat tekstur sidik jari lebih jelas setelah difokuskan. Karena itu false rejection rate nya adalah < 0.1% dan false acceptance rate adalah < 0.001% karena dapat melakukan proses data lebih efisien.

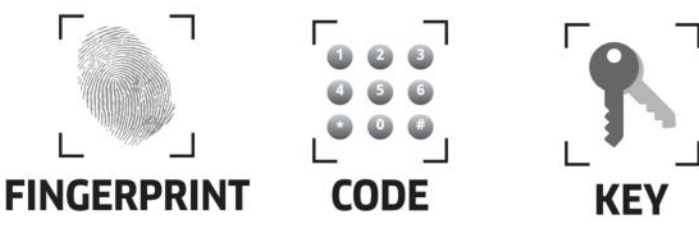

Kunci Fingerprint DUMONT juga dapat membaca sidik jari yang mengalami perubahan seperti :

- lebih gemuk atau lebih kurus
- anak yang bertumbuh besar
- jari yang mengalami luka
- jari yang kulitnya pecah2
- jari yang kotor

Papan utama (main board) kunci ini memiliki fungsi self check, memproses informasi dengan benar dan stabil. Dan disial menggunakan silica gel sehingga tetap dapat bekerja dengan baik dalam kondisi kelembaban yang tinggi. Konsumsi energi nya sangat rendah, menggunakan 4 buah baterai alkaline AAA dengan umur baterai antara 18 - 24 bulan.
