MEASURING TOOLS

STANLEY is the pioneer in measuring tools. We invented the first steel tape rules in 1930. In 1963, the classic D-shaped PowerLock® design was introduced. It had the world's first coil-able spring and sliding lock, elements that continue to be the core of modern day designs. PowerLock® was also a part of Apollo 11's Lunar Landing Gear in 1969.

UNIQUE 3-PHASE MECHANISM

A progressive torque build-up to the selected setting is easily detected by three clear signals:

- 1. SIGHT** see the mechanism progressively move towards the point of break as the load is applied.
- 2. TOUCH** feel the point of torque
- 3. SOUND** unmistakable CLICK. This makes it ideal for use in noisy environment.
